Dear School Leaders,

The Office of Academic Supports (OAS) has launched a virtual after-school tutoring program for eligible students in grades 3-12 to provide additional instructional support aligned to ELA and Math grade-level expectations. To launch the program, the Office of Communications sent parent enrollment letters to confirm student registration and tutors sent email invitations to join Google Classrooms with meeting links, session days, and times.

We don’t want your students to miss out on this opportunity, so we’re sending you a copy of the parent enrollment form HERE to pass along to your teachers and students. This document provides tutors with important parental contact information needed to share session links, student progress data, and tutoring updates. Students that have been identified as needing tutoring in Grade 3 Math, Grade 4 ELA, Grade 7 ELA and Math, Grade 8 Math, English 1, Algebra 1, and Algebra 2, have been registered and should look out for communication from their assigned tutor. Sessions for the remaining grades and content will be finalized by the end of February. In the meanwhile, parents should complete the enrollment form to ensure receipt of their child's session assignment.

We are happy to announce that we will reopen tutoring registration on March 1, 2022, and remain open until March 11, 2022. Roster chairs will have an opportunity to register students who are in need of instructional supports to enhance current learning and any prerequisite skills necessary for with or both of those courses.

If you have any questions, please contact tutoring@philasd.org

Respectfully,

Malika

Malika Savoy-Brooks, Ed.D.
